Now YOU Can Invest Like The Rich at a FRACTION of the cost!

Through the use of the little known and private world of Bank Debenture Trading Programs the average person has been given the opportunity to invest in the same arena as the "Big Boys!"

These Bank Debenture Trading Programs used to be out of the reach of the average person...

...until now!

The arena of high profit investing, coupled with high Security, has always been the domain of the super rich. Only lately have the doors opened to a select few people to invest in terms that we can comprehend.

These investments START at \$ 10,000,000 US! There was no way for the average citizen to even dream of using these secure investment forums. There are some new groups of people out there now who are opening the doors to the "little guy" to join together with like minded people to POOL their investment capital into the minimum participation level.

But, I'm getting ahead of myself. Lets start here:

WHAT IS A BANK DEBENTURE TRADING PROGRAM?

Also referred to as a secured asset management program, this is an investment vehicle commonly used by the very wealthy where the principal investment is fully secured by a Bank Endorsed Guarantee. The principal is managed and invested to give a guaranteed high return to the investor on a periodic basis. There is no risk of losing the investor's

principal investment.

This investment opportunity involves the purchase and sale of Bank Debentures within the International Market in controlled trading programs. The program allows for the investor to place his funds through an established Program Management firm working-directly with a major Trading Bank.

A Bank-Endorsed Guarantee by the Banking Institution secures the investment funds at the time the funds are deposited. The Investor is designated as the Beneficiary of the Guarantee unless otherwise instructed by the Investor. The guarantee is issued to secure the Investor's principal for the contract period. This guarantee will be Bank Endorsed with the Bank Seal, two authorized senior Officers' signatures, and will guarantee that the funds will be on deposit in the Bank during the contract period and will be returned fully to the Investor at the end of the contract term.

The Investor is also guaranteed by the Program Directors, by contract, that they will receive what is in effect a percentage of each trade made by the Trade Bank. This can be in the form of a guaranteed profit/yield paid on a periodic basis upon terms as set forth in the contract.

The Instruments to be transacted under the Buy/Sell Program are fully negotiable Bank Instruments, delivered unencumbered, free and clear of any and all liens, claims or restrictions. The Instruments are debt obligation of the Top One Hundred (100) World Banks in the form of Medium Term Bank Debenture of 10 years in length, usually offering 7-1/2% interest, or "Standby Letters of Credit" of one year in length with no interest, but the profits are distributed according to the agreement and the process repeats for the duration of the contract.

HOW OFTEN DOES THE PROGRAM DO TRANSACTIONS?

Operations will take place approximately forty (40) International Banking Weeks per year, with specific transactions taking place approximately one or more times per week depending on circumstances. Although there are 52 weeks in a year, there are only 40 International banking weeks during which transactions take place. An International Banking week is a full week, which does not include an officially recognized holiday. However, this does not preclude that transactions may occur on short weeks that have a holiday.

WHY ARE THESE "HIGH RETURNS WITH SAFETY" PROGRAMS NOT GENERALLY PUBLICIZED?

The answer is that these programs have been available, though not widely known, for years. However, because of the extremely high minimum requirements to enter them, only a few could qualify. The minimums have been 10 to 100 million dollars previously. Only recently have the smaller minimums been available so that more can qualify and yet have the opportunity to earn exceptionally high and safe profit yields. Also, the Investor must be "invited in", to participate in these very limited enrolment programs.

Individual programs can quickly become filled and are then closed to further Investor participation.

LEVERAGED TRADING PROGRAMS

By leasing assets, usually in the form of United States government Treasury Bills, for a fraction of their face value, the ability to purchase and subsequently resell bank instruments in large quantities is possible. This is the principal on which leveraged trading programs revolve. The leased assets provide the collateral against which the instruments are purchased and resold, with the entire process taking only one or two days to accomplish.

The large profits produced by trading programs are created by the difference between the purchase cost and resale price of the instruments. Even with a net profit of four percent per transaction, the process of buying and selling can be performed several times each week, providing for profits which make the return on other investments pale by comparison. A four percent profit produced just once weekly for forty weeks would total 160%.

By leasing assets, the profit is generated on a much larger amount of instruments, greatly increasing the total dollar profit.

This is just a short, simplified layout. You can find more information on this subject at:
<http://www.valtechservices.com> - under The Private Placement Program.

PS: There is also a way that you can take advantage of this opportunity even if you have NO investment capital! The information on this can also be found at:
<http://www.valtechservices.com> - under The Money Broker Program.

You can simply find the people that these groups need to fill their groups with and you will receive a percentage of the profits made by your referrals.
