#1 Web site promotion techniques <http://www.web-site-promotion.gr>

I am always looking for sure-fire and free ways of targeted advertising.

I'm referring to the unsurpassed effects of Viral Marketing using Internet Automation Tools.

If you are in the Networking business, or looking for effective yet free ways to advertise your web site, you just can't ignore using this avenue of Online Promotion Methodology.

I am referring to the implementation of Free Traffic Exchange Tools and Services to enhancing your marketing mix-up.

If you assess that this method of Online Venture Branding is worthless, you'd better think twice.

Using this method of Free Traffic Exchange Tools and Services as a supplemental tactic of traffic and subscriber-base building, will pay-off in the long run because \*consistency\* in advertising works.

Are you ready to instantly test a certain section of your web site?

Are you prepared to target specific groups of people with particular psychographics?

Do you want to reach ruthless & "go-get-it" 2-tier associates to promote your program?

I did it my self...

Now with those tests and parameters, I know how effective my sales literature is to \*special groups\*, and how my e-zine list momentarily grew,

not to mention the instant boost in my downline  
with multi-tiered programs!

Thanks to those services, I can now harness an extra of 3 figure number in Web Traffic, so does my  
loyal downline -- so can you!

What are you waiting for?
