Increase your traffic by 50%...instantly

By Jason Olson - Ultimate Web Designing -12/10/02

As web site owners, we are all looking for ways to increase traffic. There are various ways to increase your number of visitors by spending money. You could advertise in the newspaper, submit to pay-per-click search engines, or many other ways that might cost too much.

You could also increase the traffic to your web site for free!!! That's right...FREE!!! Free, the four-letter word that people look for on the internet. But how can you do it for free? You could submit to some of the search engines for free but you might not be listed in their database for a few months. Or, you could sign up for free with TrafficZap <http://www.trafficzap.com/exchange/index.php?rid=4645&q=821> and watch your traffic increase by 50% instantly because you are swapping visitors with thousands of other webmasters generating a stream of unique visitors.

How does it work? It works with popunders. When a visitor to your site exits, a popunder browser window appears. This popunder contains the web site of another company involved in the TrafficZap network.

For every 2 popunders you show, you get 1 popunder display back on another site in the network. Your web site will appear as a popunder to an internet user who has visited a site within the TrafficZap network. The same is true for others in the network because their site will appear as a popunder to someone visiting your site.

For example, a web site Ultimate Web Designing designed, Jason's Cards <http://jasonscards.netfirms.com>, became part of the TrafficZap network and for every two visitors Jason's Cards receives, TrafficZap displays the home page of Jason's Cards to

one visitor of another site within the network.

Therefore, the traffic to Jason's Cards increased by 50% in one day. How many other forms of marketing can increase your traffic by 50% instantly, for free? Not very many.

Regardless if you are currently receiving 20 visitors or 2,000 visitors a day, your traffic will increase by 50%. TrafficZap has other traffic building options to choose from. For more information on TrafficZap, visit their web site at <http://www.trafficzap.com/exchange/index.php?rid=4645&q=821> .

Jason Olson is the owner of Ultimate Web Designing <http://www.ultimatewebdesigning.com> offering web designing, web hosting, search engine strategies, and search engine submission.
