"I just can't seem to concentrate, stay motivated and keep focused on the job in hand" ?

== by John Metcalfe ==

One of the main problems with personal development and success that I have discovered, is that we are not accustomed to staying motivated and focused. We have to learn how to do it, just like any other skill we learn in life...

Below are things that I have discovered on a personal level with my own development. I use to work in a factory on a production line type job, until I discovered the power of the Internet and the opportunities it holds for all of us.....

Here are my discoveries, and remember if stupid old me can do it, so can YOU!

As a rule, most people are accustomed to earning so many \$ or £ per hour in a normal job, whether it is \$8 per hour or slightly more. Now the majority of the population does not believe that it is possible to earn \$5000 per month working from home in their bedrooms. They are accustomed to earning a wage per week for so many hours work.....

Take myself for instance, I am not earning \$5000 per month from my bedroom at the moment, but I honestly believe that I will be in the coming months or year at the most. The key here, is to actual believe it is obtainable.....

At first I did not believe I could earn \$1500 per month

from home, but here I am now, actually doing it..
Some months are better than others and I don't earn that all the time but as I said, the key here is to actually believe you can....

The one thing that I found motivated me the most, and it might do the trick for you also, is the following...

I always wanted a fancy sports car, and had admired all the people who I had seen driving them. I always wondered to myself, how did they acquire all the money to buy one of these beautiful machines. Then it suddenly dawned on me that they really weren't much different than me, besides they actually done something, and had not just sat there like the rest of us.....

I bought a sportscar magazine with a picture of the dream car I would like to own. Here is the actual picture if you would like a look:

<http://www.secretmarketingstudy.com/mgsportscar.jpg>

I then placed this picture onto the wall next to my computer as purely motivation for what I wanted. Seeing that picture everyday on the wall gave me incredible motivation to succeed. The important thing here is that it must be something you really want for it to work. Go ahead, try it and see if it works for you..

It may seem strange at first, but honestly it works. I now drive one of these beautiful machines, and now have something else on my wall next to my computer for motivation...

A big thing is to DREAM BIG. Actually see yourself driving that expensive car you have always wanted or owning that beautiful house you would like to live in. Dreaming alone will not do it obviously, but this will give you the motivation that you will need to pick up those books and start reading and reading AND doing....

Another key is to Do It, and not just read it....

Personally I think it is very important to read motivation books as well as Internet Marketing, Home Business books or whatever your interested in. This has also helped me a great deal as well.....

We all lack motivation now and then, even the greatest, wealthiest people don't have unlimitless supplies of it. One book I highly recommend anybody reading is: "Think And Grow Rich" by Napoleon Hill, very very good book which you will learn a lot from, especially about yourself and what kind of person you are...

Do a search on Amazon for "Think and Grow Rich"

The people that fail are the people that basically give up too soon, or do not believe they can do it. The people that succeed, are the people that keep going, even when they come across barrier after barrier.....

Just Keep Going Until You Achieve What You Dreamt Of!

Regards and Good Luck with whatever you do..
