Getting Started In Internet Marketing
by Kent Smith

So you have gone to the web, found the greatest new affiliate or network marketing program in the world...you are now going to take the internet by storm and walk away with bags of cash!

Well, don't quit the day job just yet!

The lure of the Internet is addictive and there is huge money to be made but if you think joining the affiliate program and posting a few classified ad and FFA links will make you rich you have been sold a bill of goods.

But there is hope! Great hope if you keep a few things in mind as you start your new venture.

1. As with an offline business, it takes time to get the engine cranked and the vehicle moving. But once you do it is a powerful thing.
2. The really successful people in the affiliate or online marketing game do not just have a replicating web page. They have a domain, ie. www.makememillions.com and they build content on that domain and pre sell their visitors to the affiliate products they represent.
3. They promote, promote and then promote some more!
4. Persistence. Rome wasn't built in a day and your Internet empire won't be either.

5. It can and will happen! Folks are making BIG money, consistently and there is no reason why you can't do the same!

There are volumes written on this subject but the bible on this is a FREE 5 day course by Ken Evoy of SiteSell.com. You can get it right now by clicking here <mailto:tamswebbiztoday1@sitesell.net>
