3 Forgotten Success Secrets!

by Larry Dotson

DON'T PAUSE LONG

1) Stay away from being too comfortable with your income or life. You should always be making new goals for yourself and developing new sales ideas. The world keeps changing and if you pause too long, you might miss out. You only live once.

DON'T WORK MUCH

2) Make sure you don't become a workaholic. Your mind needs time away from your business life. This will help your brain think clearly while working. The best time to get profitable ideas is when you're not thinking about them. They just pop into your brain

DON'T GET FRUSTRATED

3) Create and follow short/long-term goals for your business. The short-term goals can create early success and the long-term goals can create future success. Design each goal so they all add up to your ultimate goal. Don't make your goals too unrealistic otherwise depression and frustration could move you farther away from them.
