Learning to install and use CGI scripts  
on your website can open up a whole  
new realm of possibilities for you.

CGI scripts can be used for many important  
everyday tasks like:

- 1) Sales
- 2) Subscriptions
- 3) Tracking of e-book downloads
- 4) Recommendations
- 5) and many more.

The simple mention of the term CGI is  
enough to raise the hairs on the back of  
the neck for most webmasters including  
some of the seasoned pros.

Not to fear...there are a lot of great recourses  
available to help walk you through the CGI  
learning curve.

Here is one that I recommend for learning to
