Knowing how to automate many of the daily tasks is one of the most useful things you can learn about working on the internet.

Your time is important, right ? How can you go about saving some time and increasing your productivity ?

One of the simplest ways is the use of autoresponders to do the trick.

What is an autoresponder ?

An autoresponder is simply a program that runs through an email program that is designed to automatically respond to an email message sent to it with a certain prepared response. Normally it is a sales letter, which is then sent to the email address of the person who sent the request.

Click here and send a blank message to this address to see how it works:
