So you are looking to make some money on the internet...right? How do expect to do it - Join some MLM program or become an affiliate ?Better yet - " Work at home "

Never mind which way you choose ,money will be made... NOT by you but THEM!

Each day a new marketing company emerges on the stage with its own benefits and policies.They urge you to join them.Some of them will go on to say " We will build your downline "

If you are mature enough you will think -"why the hell do you need me if you can build my downline ?" !!!

The marketing GURUS out there are striking Gold out there...but is it your GOLD? Yes,a definite yes.Their only income is from an ever-expanding network of new people being brought into this shell game, until the largest leg and the lowest level of the MLM pyramid collapses and the whole game ends. The people at the top get rich, the folks in the upper levels do well, but the majority of the people get burned. But at least these people still have their Internet Malls, right? They can make money from commissions paid on mall sales, right? Not likely in the first place. More importantly, once the MLM expands as far as it can and the money stops flowing, the owners will vanish to an island in the Caribbean, the ISP will turn off the servers, and the entire Internet Mall community will vanish in an instant. No malls, no refunds, no commissions. Every bad MLM opportunity makes money for the people who start it.

And where does that money come from? From the thousands of people who do not research these companies and their products before investing their hard-earned money into them. The Internet Mall fad will pass - and the sooner the better!

There are thousands or may be millions out there who have been ripped of by this MLM charm. The fact is only 2% of these will make a decent living out of these programs , forget about the Millions.

Another buzzword around the corner these days "Work at home" after joining you might ask " What Work And What Home? " People join these work at home programs by paying some \$60-\$70 registration fees (you might have done so) How much they earn? Well most of them never make for that minimum amount before they can get the cash in hand ! They boast of excellent support.Yeah right...but you need money not their support!

So , next time you get into this business just check out if The Company offers to build your DOWNLINE or better yet- pays a RESIDUAL INCOME FOR LIFE !!

Happy Surfing !
