How to Learn Enough about Computers
to Run an Online Business Easily and Efficiently
By Nam Tran Ybarra

When I started my Online Business back in November 2000, I knew nothing about computers. Nothing!! All I knew was how to open my hotmail account and check email! Could you believe it? I didn't know what browser was, HTML, uploading, downloading, create folder. I was having problems with everything, you name it, and I was having problems with it. Well, I searched the web and came across this website- I can tell you this is extremely wonderful site- it teaches you HTML, Java script, and much more....with a very interesting way- you will have a lot of fun with Doctor Joe. Very easy to understand and best of all it's free!!!

In just seven days, you will learn enough about HTML to build your first website! Here is the website URL:<http://www.htmlgoodies.com>

If you are a beginner, you should start from here: <http://www.htmlgoodies.com/newbie.html>

Another resource where free lessons send to your mailbox is <http://www.learnem.com/index.html> .

For a small fee you can have personal support also. A very good ebook : The Complete HTML Teacher is a must read. This book give you a comprehensive everything you need to know to build your online website-business. You can download this ebook at my free members site:

<http://www.icanyoucantoo.com/free.html>

or send a blank email <mailto:subscribe@icanyoucantoo.com>

One more thing I would like to share with you is the feeling you get once you "Graduate" from these

classes, it is exhilarating. You'll have knowledge you never thought you could have. You'll be doing things you thought only those * Other* people could do.

Remember don't hesitate, JUST DO IT!!.

Once you acquire these skills, you will be able to start earning a living online. This will impress your friends, family and co-workers. Don't give up! Even if you don't know how to type yet, and can barely get to your Window desktop, you can still get totally up to speed within 4-5 months if you work at it.

As I told you earlier, when I first started I knew nothing. Not only that, English is not my mother language, so you could imagine how difficult it was for me! The right direction is there, but no one can take the courses for you JUST YOU. Nothing is Stopping you but YOU. If I Can, then You Can Too!!
