For the longest time I was so sure there was no method to market my business online for free. Everywhere I looked there was a company wanting to market my company for a price, willing to give out all sorts of guarantees only if I paid well over 100.00 or more. Finally I got tired of it and virtually gave up on trying to market my website. If I am trying to make money by marketing my website, where am I going to get the money to pay someone else to do it? I figured there must be a way to do it yourself. Afterall if you paid someone, that person would have to do it themselves, there's no magic to marketing, just alot of know how. So I researched and looked around for articles and resources. Finally coming upon something "hidden" within my own website <http://onlinemarketing.uwebtrace.com> I found free ways to promote my small business. And now I have been turning a profit from the marketing I did on my own and for free.
