Persistence Is What It Takes!

Do you want to just 'earn a living' for the rest of your life? Or have security and time for your family, travel, and a comfortable lifestyle?

It's never too late to learn or change. Start small and grow slowly, learning all the time. Don't whine about not making money. If you do the work, the money will follow. Focus on your goals. Where do you want to be in 1 year, 5 years, 10 years, or 20 years?

Nothing worthwhile comes overnight. You must do the work, put in your time, fall down then get back up again. Give your business time to work and grow. Don't expect a lot of money right away.

Get-rich-quick is not an option! Why waste time and money failing at this when you can start out slow and steady. Be persistent in your marketing, help others on the way and you'll get there faster than get-rich-quick.

Did you fail in all the programs you joined? You haven't sold any of your products yet? Not getting any response to your ads? Did you have a problem on your website? Did you get it fixed and then find another problem? Ready to give up and quit?

DON'T DO IT!

What did you do today to make money?
The possibilities are endless!

You need your own website and domain name. To get noticed, you must be customer-friendly, post ads, send feedback, write articles. Participate in

surveys, interviews, profiles, site reviews. Join affiliate or MLM programs. You could also publish your own ebook or ezine.

These are just a few ways to get recognized. Then when someone wants your product they'll remember YOU.

Persistence - and a whole lot of patience helps too.

You must love what you do. See yourself succeeding. Challenge yourself - you might be surprised at the results! Think about what YOU need to do to change the way things are going for you. Take control of yourself and your future. Decide what you really want and go for it! With the right attitude you can be anything you want! You don't want to live with the unanswered question...WHAT IF... do you?

Never give up on your dreams! Persistence is what got my website up. I knew nothing about website building when I began. When I got stuck (which was often) I contacted some of my publisher friends and asked questions until I could accomplish my goal. I may even have been a pest at times! I prefer to think of it as PERSISTENCE!

Love yourself, believe in yourself, imagine yourself succeeding and reaching your goals.

See you at the top!
