by Raymond Johnston Jr

There are many new traffic exchange sites that have popped up in the last few months. I personally use quite a few of them and generate an average of 200 hits a day from them.

It is not something that happens overnight but if you start signing up some people in a few of these programs, you will reap the benefits of your effort.

There are many to choose from and for those of you who use them, I am sure you have your favorites. There are some that will provide you with a lot of hits but what you are looking for is quality hits. You are looking for the ones that actually bring you traffic that will respond to whatever it is you are offering.

I personally also like to use a rotator service to send my traffic to different sites that I have. There are free rotators out there, though most that I have used are not of the quality of eBiz Rotator. You can join free and rotate three sites, but I personally use the upgraded service that costs \$48 for six months. For eight dollars a month, you can not only rotate up to 10 sites, you can also advertise another ten on your portfolio page. They also offer an affiliate program and building a downline in it has been quite easy.

By rotating your sites, you can build a nice downline in several programs and still advertise your products and website as well. This system works very well to start building traffic. Here is my eBiz Rotator site in case you would like to check it out. <http://www.ebizrotator.com/goto/RJ1550.htm>

I would also urge you to join as many of the traffic generator sites as possible. The more of these programs that you can start building a downline in, the more traffic you will see in the future.

I, like most of you, have my favorites of these programs. I think you will find that some just bring a higher quality of visitor. Here are three that have given me a lot of visitors and I have been pleased with the quality.

AdSwappers - This is one that I just joined a few weeks back but is already a favorite. The quality of visitors from this site has been very good to this point. You can check it out here. <http://www.adswappers.com/index.cgi?refid=braveone>

TrafficJumbo - This one has generated 3,000 hits for me in a month and a half. You get 150 hits for each person that joins under you. You also receive one hit for every four times that your downline generates a hit. This helps generate traffic very quickly. You can check it out at <http://www.jado.org/ttintro.php?referrerid=288>

HitPulse - This is one that I actually did not care much for until recently. They have made a lot of changes and I am now getting some nice traffic from them. You can check them out at <http://www.hitpulse.com/cgi-bin/start/newuser.cgi?referer=braveone>

As I said before, join as many as you can, start building a downline and you will start to see your traffic grow. Here is a list of some others that you might try as well.
