HOW TO WRITE YOUR OWN EBOOK - by: Sally Widjaja

I know so many success stories with writing an ebook, from just information product to real secret information such as how to win lotto with a unique 1 minute system (<http://www.aubizhelp.com/clickbank/honestlottosystem.htm>).

People have been selling their ebooks ranging from \$9.95 to that \$97.00 per copy, depending on what type of information they sell, or how thick the book is. (Some people judge a product on their price and cover, just like my dad)

Anyhow, all these sales made by ebooks proves that the potential for E-book success can never be better than right now!

Internet and Electronic books are like match made in heaven. While I think personally selling tangible (Real physical objects) is really hard on the internet, selling ebooks is easy, why don't take advantage of the new tools of the internet to sell the hottest promotional product - to the whole wide world without worrying about shipping prices. (After an ebook is sold, usually people can have instant access and instant download to the valuable information they are looking for)

There are various reasons on why you should create your own ebook, however, the best reason I can think of is that by writing your own ebook, you can have the best marketing tool for your website, and of course, ebook is also one of the best tools to make you a super affiliate. (Get it at <http://www.aubizhelp.com> for free)

Here is some of the reasons:

- You can be your own boss, your own publisher and distributor to those bookshop owners in the world
- You can sell an E-book on your web site or in auction, wherever you like - and keep all 100% of the profit
- You can promote your URL through your ebook and advertise YOUR products and services in it
- You may give it away as a UNIQUE bonus, original bonus that people can't get anywhere else as a reason for them to buy your products

-You can sell the reprint rights in your ebook.

- You can submit articles from your ebook into e-zines and get your products again, promoted by that ebook and more.

Alright, one of the most problem I'm getting people asking me is that, they are not writers, they never pass their english HSC. Well, do you think I have? well, yeah I DID pass my english high school, but then I was like, not the top students. (I bet the top students can't write better than me, or YOU) Don't worry! You don't have to be an expert to write about anything. At least, try it!

When you decide to write an ebook, constantly improve your skill, and the useful links you can find on the left of this page (<http://www.aubizhelp.com/ebook.html>) can be useful for you.
