Online Communication Tools That Will Save You Time
By Bob Brolhorst

With an ever increasing work load to businesses today. It is necessary to know and use all of the products that available to us. By using some or all of the products below, some of which are FREE, you will be able to save something that is even more valuable than money, and that is TIME.

<http://www.CallWave.com>

CallWave has developed two FREE alternatives to expensive second phone lines. The Internet Answering Machine is a free alternative to a dedicated modem line, and FaxWave is a free alternative to a dedicated fax line. Both are available to Internet users nationwide, and can be up and running in minutes by clicking "Get it Now!" You will also get FREE unlimited technical support!

<http://www.Intranets.com>

What is an Intranet?

An intranet is a private, secure space on the web which all members of your group can easily access and use to share documents, calendars, and event information. An Intranets.com site is the ideal online communication tool for businesses, departments, groups, and organizations. Your intranet includes site hosting, a custom URL, and a full array of web applications. Use your site to centralize important company information, post documents, create group schedules, announce events and more

<http://www.Livehelper.com>

Livehelper is a customer service tool for your website that enables web site visitors to instantaneously communicate with your customer service personnel. Visitors to your web site simply click a Live Help button and are connected with one of your customer service representatives. Your company representative then assists the visitor by providing information, links, graphics, or even guiding

them through your web site.

<http://www.efax.com/index.html>

eFax allows you to receive faxes and voicemail by email, or receive wireless notification. You will be able to send fax and have other features with eFax Plus which costs \$4.95 per month.

<http://www.MyPlaceWare.com>

This website offers a free Web conferencing service. It allows user to conduct live graphical and interactive meetings with anyone, in any place over the Internet with only a web browser and a phone.

<http://www.OneBox.com>

Onebox.com is a free service that gives you voicemail, email and fax--all in one place. You get a free private, local phone number and free email address so that all your voicemail, email and fax messages come into one Inbox - your Onebox. Plus, you can send email in your own voice, so you can stop typing and start talking your email. Just click, speak and send.
