I highly recommend this book. I have used some of their methods and can tell you that what Stephen Mahaney teaches in this book are time tested methods that can work for anyone.

The search engines can change how you register your website any time they choose and what Stephen Mahaney and Plant Ocean does is to keep a constant watch on how the search engines change so you know all the tactics on how to keep your website listed at the top.

The best part of "The UnFair Advantage in Winning the Search Engine Wars"... is the guarantee...And, They guarantee it! ...that is, we guarantee you'll be more than satisfied with the help our book provides or else you can tell us The Dog Ate It anytime within six months. If so, you'll get a no-questions-asked refund within a single business day ... along with a courteous thank you and a note that says "you can even keep the book!"
