Are you making money as an affiliate? If not then you are a free on.

Did you know that 10% of all affiliates receive 90% of the sales. Do you sign up as an affiliate and then just sit back and do nothing?

There is only one way to make money as an affiliate and that is to constantly promote your program.

As easy as it is today to build a web site, you should be promoting your affiliate program with your own web site and your own domain name.

If you know nothing about building a web site then get free ebooks and study. With free templates it is very simple to build a web site.

If you can't write an ad, then again get free ebooks and study. What good does it do to sign up to be an affiliate and then do nothing.

Copy the affiliate that is earning \$2000.00 a month and you will see that the affiliate is constantly working.

If you can afford to purchase what you are promoting then you should do that. Study what it is so you can write better ads, because you know the product.

Working online is no different than any other work. You get what you earn, not what you wish for.

There are no genies in bottles that will grant your wishes only work, promote. Work and promote some more.

If you are a serious affiliate, here is something else you should be doing, building your own opt-in list.

Offer a newsletter, a free course or anything to build your list. Once you have a list you can make sales by promoting your affiliate products to them.

Think about why you signed up to be an affiliate. I am sure it was to make money. Let's go make some money.
