Are You Working As Hard At Home As You Did With Your Day Job?

We keep reading online ads that say, enroll now and we will do all the work for you.

Also we read the great thing about having your own home business is that you can work only the hours you want. Or when you have your own home business you can make money in your pajamas.

We also read, you can make money with our program even while you vacation in the Bahamas. We see web sites that the first thing you see is a man and a woman on a pretty sandy beach.

The next picture shows a half million dollar home with 50,000 dollar automobiles in the driveway. All this to put the picture of easy money and success in your mind.

We would all like to be wealthy or at least have enough money that we had no worries about our credit card payment or other bills.

There are no get rich quick ways on the Internet any more than there are in the brick and mortar world. There are no programs that you enroll with and then they do all of the work and you just rake in the money.

The statistics say that 95% of all online businesses will fail. If you believe these fairy tales you are going to be in that 95% and you will also be very broke.

Now that I am retired I think back to my work days where I was working on a salary. The company I was with just kept piling on more and more things I had to get done.

One day I complained to my supervisor that I was already working 10 hours a day and could not get all my required tasks done. The answer I got was, if you can't get everything you are required to do done in 10 hours then start working 12 and if that is not enough hours then work 14 hours.

At that time I was very upset with his answer because being on salary I got the same pay for 14 hours a day as I did for 8 hours and he knew it.

I felt I had to do it because a good job was very hard to get if not impossible. He knew that also.

As I am now starting my seventh year online I think about things like that and then I think to myself, now I put that many hours and sometimes more online with 5 web sites and working this newsletter.

What I am trying to tell you here is, there is money to be made online but you must work, work, work because you do not want to be counted in the 95% that will just give up.

If you are going to try your hand with your own work at home business then be determined to succeed. You will have your ups and downs but keep the proper attitude and you will succeed.

Wishing you complete success!
