You've decided you are going to setup your web site and make big money as a work at home marketer.

You've read all the get rich quick ads and figure it is time to get your share.

Every thing you've read say's how easy it is.

You've admired those sites showing their daily sales, and you figure it is now your turn to get your bucket of money.

You know if everyone else can make those big bucks that there is no reason that you can't do the same.

You read on a lot of web sites where it read, we will do everything and all you need do, is take your checks to the bank.

What could be easier than this, no wonder everyone is getting rich online.

You figure, if all I need do is take my checks to the bank, I will join 3 or 4 of those that does everything and I will have truck loads of money.

I hate to be the bearer of bad news, but my advice is to not quit your day job.

At least wait until you get your first truck load of money.

If you have not figured out what I am saying here

then I will tell you, we all started down that same path, being lead by those silver tongued devils that only want your money.

For most, it will take at least a year or longer to start making a little money.

Wishing You Complete Success.
