FREE Will Soon Be A Word From The Past

Have you noticed that free sites are disappearing on the Internet?

With sales on the Internet at an all time low, something has to go. These sites are not on free sites, they have expenses to keep them going.

They have hosting fees, advertising fees, and a host of other expenses like you and I have with our marketing sites.

In order to keep their selling sites going they must shut down anything that is not producing any sales, that is these free sites.

When I first hooked up to the Internet a few years ago, it seemed everywhere you surfed you found free stuff.

Free graphics, free web page templates, free counters, free guest books etc.

I'm sure these free sites were used in hopes of selling you something on the backend. As tight as money is today, these free sites bit the Internet dust.

If you are looking for something free today, it takes a little looking and then you may not find what you need.

It is my opinion that if things continue going downhill on the Internet, that free will be a word from the past on the Internet.

Would like to hear your opinion, send it to me.

God go with you.
