These Stupid spam Filters Mean Internet Death.

Have you thought about what these stupid spam filters are doing to the Internet?

Suppose they stop all newsletters, all ads etc.

Who will Internet marketers sell to, their family members?

A better question, is who are these idiots pushing these spam filters going to market to?

Maybe they think the Internet is just a beautiful place to visit, look at a couple of sites and then go watch more TV.

I can just see them with their smug little smiles thinking, boy we are killing spam and it will not be long before we have the Internet all cleaned up.

What they can't see is this, killing those that harvest email addresses and send one unsolicited email after the other would be fine, but to kill those who are trying to do what they know is proper is just crazy.

This is like cutting off your nose to spite your face.

Wake up everyone before you destroy the Internet.

You are already well on your way to doing exactly that.

You will not like what you end up with. If you want results, then go after the guilty not the innocent.
