A lot of people ask me if I can give them one piece of advice on how to be successful on the internet... what would it be?

Believe it or not, it is not any tool that I use or marketing strategy or secrets that I possess.

The biggest thing that got me where I am today is by changing my mindset. By changing how I think.

Now, this may sound crazy to you, but trust me it is not.

What has to change is the way you think. Your mindset. I changed the way I thought and said hey... I can do anything I want to!

I can write articles... I can write press releases... I can try new marketing ideas or techniques... etc.

As the Nike commercial said:

Just do it!

Your mind is more powerful than you think. We put limitations on ourselves because of what society or friends, family, the media etc. tell us.

You can't do this.... You can't do that....

Stop the negativity!

You can do anything you want to! But it has to come from within you! You have to believe!

Change your mindset and a whole new world will open up to you.

This is really the most important tip of all that I can give to you.... to change your mindset and how you think!

Why am I telling you this?

It is because when I started changing my mindset and trying new and different things... it is then

when my online business started exploding.

Think about it.

Better yet, change the way you think about it.
