A thousand of new home businesses starts every day. Internet is exploding and more and more people want to use that information highway to start or expand their existing business.

Many of them fail in the first few years. The reason why that is happening is very simple. They didn't succeed to create a system that generate Multi Streams of Income. To achieve that you must work multiple affiliate and/or network opportunities. The super affiliates and network marketing leaders do the same, but they don't want to talk too much about that. This is one of the reasons for their success.

It's very risky to run only one opportunity. If or when your opportunity goes out of business you must start from the beginning. All companies declare to run only their business opportunity. But that is their self interest and if you really want to protect yourself from financial tragedy you must work multiple opportunities.

For example, in the last 50 years or more, a long history of network marketing there were thousands of companies involved. Today only about 40 still exist.

There is no question .. if, BUT infact "when" some of these companies will go out of business. That is the main reason why you must run multiple opportunities to protect yourself from financial disaster.

Fortunately we have a powerful Affiliate programs technology on the internet that helps us to run multiple opportunities. Affiliate programs are very popular today and they have

a proven technology to run multiple opportunities and to get referrals.

The consumer to consumer marketing system is growing and it works. It's little impersonal, but it's very efficient and in that moment the most successful business model on the internet. Affiliate programs are usually two tiered and with little or no money you can start earning a good commission almost immediately.

But there is the dark side of running affiliate programs as well. Majority of affiliates don't have enough knowledge to use internet technology and successfully promote their opportunities. On the other hand, the business opportunity owners usually have the same problem. Most of them don't know how to successful run business on the internet. There are exceptions, but they are the minority.

We all know the financial result of running these programs. Affiliates make little or no money and they are unsatisfied. Very small percentage of affiliates makes \$50,000 or more money per year. Affiliates then become disappointed and immediately jump into another affiliate program and the story repeats over and over again.

The question is: What to do to step out of that magic circle?

The answer is: You must have your Own Business Building System. Working multiple opportunities is just simply not enough. You need a building system that generates you multiple streams of long term residual income. To be very successful you must have a business building system that will generate multiple streams of income over and over again.
